

CHINMAYA PATI

Full-Stack • AI Engineer (6+ Years)
Bangalore, India • 8699958048 • chinmaya.cp@gmail.com

Portfolio:
cnp96.github.io

Full-stack & AI engineer with 6+ years of experience building scalable products, distributed systems, and AI-powered features across SaaS, EdTech, and FoodTech.

Co-founder and sole engineer at Growfit (\$120k ARR), owning architecture, backend, frontend, mobile, infra, and automation end-to-end.

Strong expertise in Node.js, React/React Native, Python, Golang, AWS, microservices, and RAG/LLM systems. Proven ability to build 0→1 products, optimise systems, and drive measurable business outcomes.

TECH SKILLS

Languages & Frameworks: Node.js, TypeScript, Express.js, React.js, React Native, Next.js, Python (Django), Golang

Databases: PostgreSQL, Redis, MongoDB

Architecture: Microservices, Event-driven systems, REST APIs, Distributed systems

Cloud & DevOps: AWS (Lambda, S3, EC2, CloudWatch), Docker Swarm, Kubernetes (basics), GitHub Actions

AI / ML: RAG, LangChain, Guidance, pgvector, Prompt Engineering, LLM integrations

Messaging / Pipelines: BullMQ, AWS SQS, n8n Automations

Observability: Prometheus, Grafana, RudderStack, Mixpanel

EXPERIENCES

Co-Founder & Full-Stack Engineer | Growfit

June 2024 – Present • growfit.pro / dailytiffin.co

Sole engineer leading all products, services, AI systems & infrastructure.

- Bootstrapped platform to \$120k ARR with 20–35% MoM organic growth and 83% retention.
- Built entire multi-brand food delivery + subscription system (D2C + B2B).
- Developed customer app: subscriptions, meal tracking, food customization, ad-hoc orders.
- Architected delivery planner, routing engine, meal-plan management, invoicing & recurring payments.
- Built AI-powered menu planning + allergen/preference engine using embeddings & rule-based scoring.
- Implemented n8n automations for daily/weekly/monthly inventory usage reports → improved unit economics visibility & reduced operational waste.
- Managed full DevOps: Docker swarm on AWS infra, CI/CD, monitoring, scaling.

Senior Software Engineer | Upraised

Mar 2021 – May 2024 • upraised.co

- Built interview prep platform: scheduling flows, video conferencing (WebRTC), recording, evaluation.
- Developed secure online testing system with system checks, fraud detection, and proctoring.
- Created learners dashboard for coaching, mentoring sessions, content, and payments.
- Designed recruitment CRM powering placement lifecycle, opportunity pipelines & automated updates.
- Improved system scalability, performance, and product delivery velocity across teams.

Software Engineer | LoginRadius / Social9

Sep 2018 – Feb 2021 • loginradius.com / social9.com

- Rebuilt admin console (Angular → React), delivering 3× performance improvement.
- Migrated large monolithic services to microservices → faster deployments & maintainability.
- Built AWS (Lambda + SQS) notification system for high-volume event processing.
- Optimized Node.js data export service processing millions of records with significant throughput gains.
- Delivered analytics dashboards & engagement systems used across thousands of customer sites.

PROJECTS

CollabSign

Nov 2025 – Present • collabsign.ai (in closed-beta)

AI-powered creator-brand collaboration SaaS.

- Auto-Import collabs from screenshots or emails.
- Built CRM and workflows for collaborations, contracts, invoices & payment reminders.
- Added AI contract generation with Aadhaar e-sign.
- Created analytics dashboard, Instagram DM automation & link-in-bio tools for creator growth.

EDUCATION

B.Tech in Computer Science — Lovely Professional University, 2018
